

Getting Great Images In Extreme Outdoor Environments

Learning outcomes/objectives

At the end of this talk, photographers will have developed a broad understanding of key things to consider when preparing for and taking images in extreme outdoor environments

Pre-requisites

Basic understanding of:

- Handling the camera
- Basic camera equipment
- Impact of shutter speed
- Impact of aperture and depth of field
- Impact of using different lenses and focal lengths

Format

The class will run for 1 hour and cover:

- What makes an environment 'extreme'?
- Water challenges
- Dust challenges
- Temperature challenges
- Time challenges
- Lighting challenges
 - > High contrast
 - > Low key
 - > Low light
 - > UV

Number of participants

Minimum 6, Maximum of 12

Fee

\$80 (includes GST)
